- Configured product can be added to cart directly from Category page.

- To know more about our Magento Brainvire Configlist Extension Services feel free to call us at +1.631.897.7276 or email us at info@brainvire.com.

Installation Steps

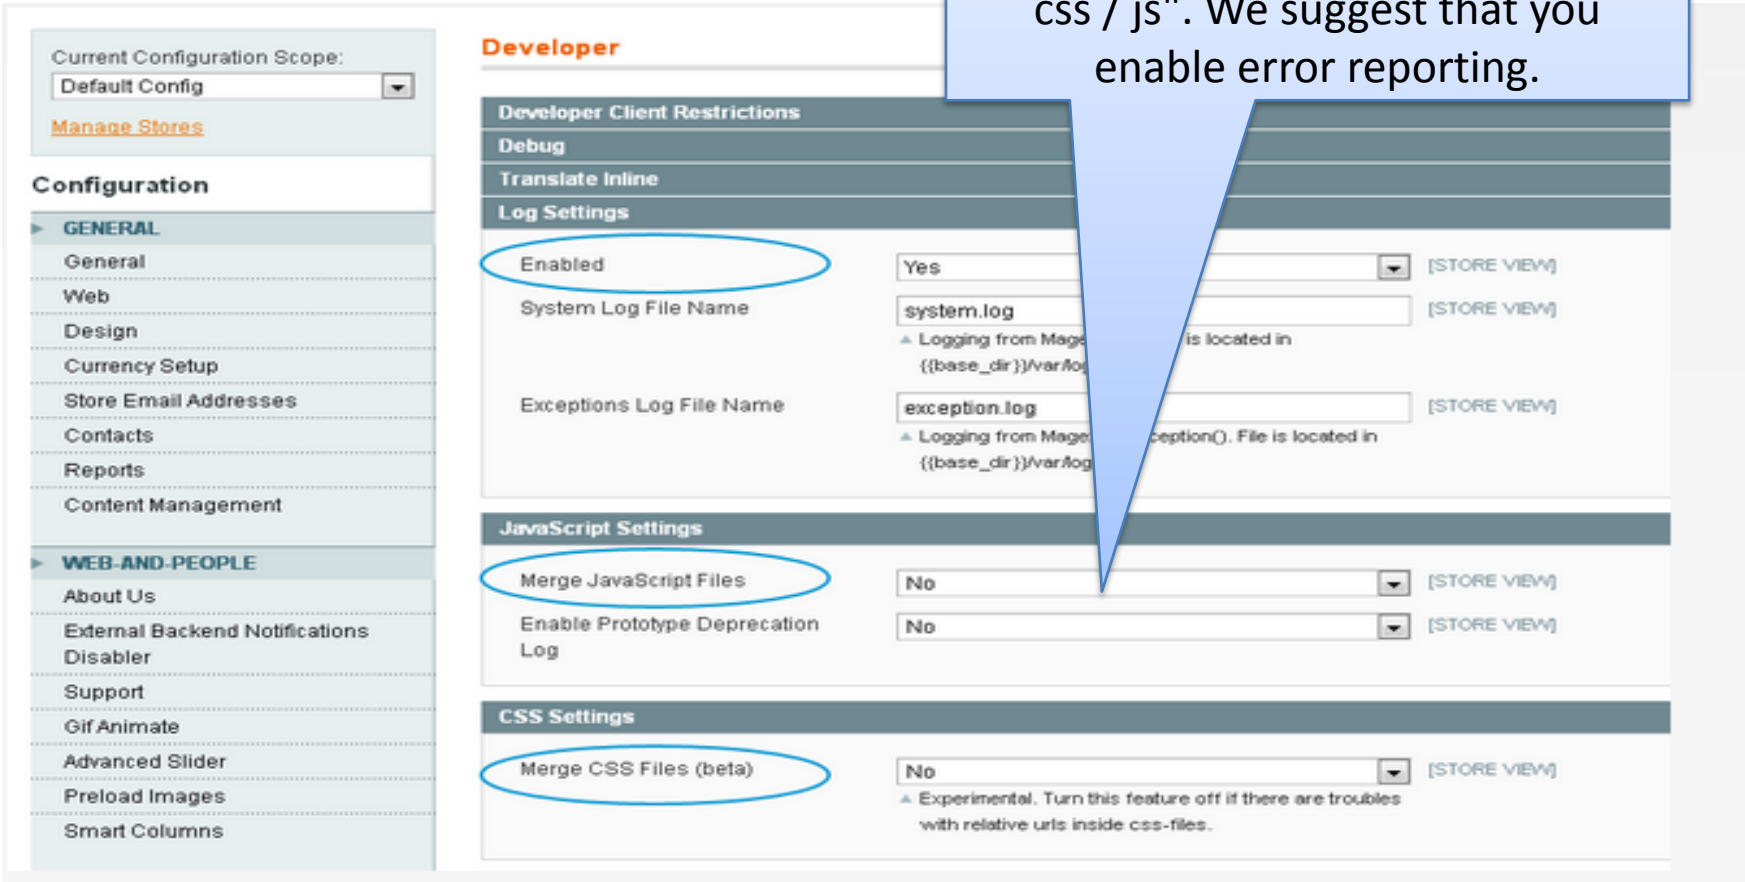
1. Clear the store cache under **var/cache** and all cookies for your store domain.

2. Disable compilation for Magento 1.4+. Log into Magento **Admin Panel and go to System → Tools → Compilation and disable the** compilation.

Installation Steps

3. Disable JS & CSS merging

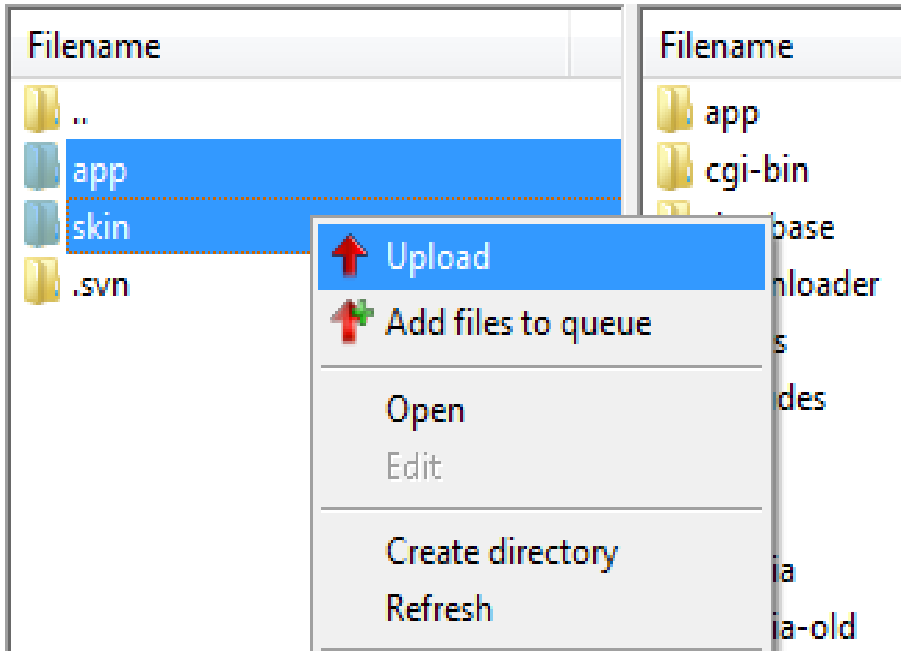
Navigate to System->Configuration->Developer Tab and disable "Merge css / js". We suggest that you enable error reporting.



Installation Steps

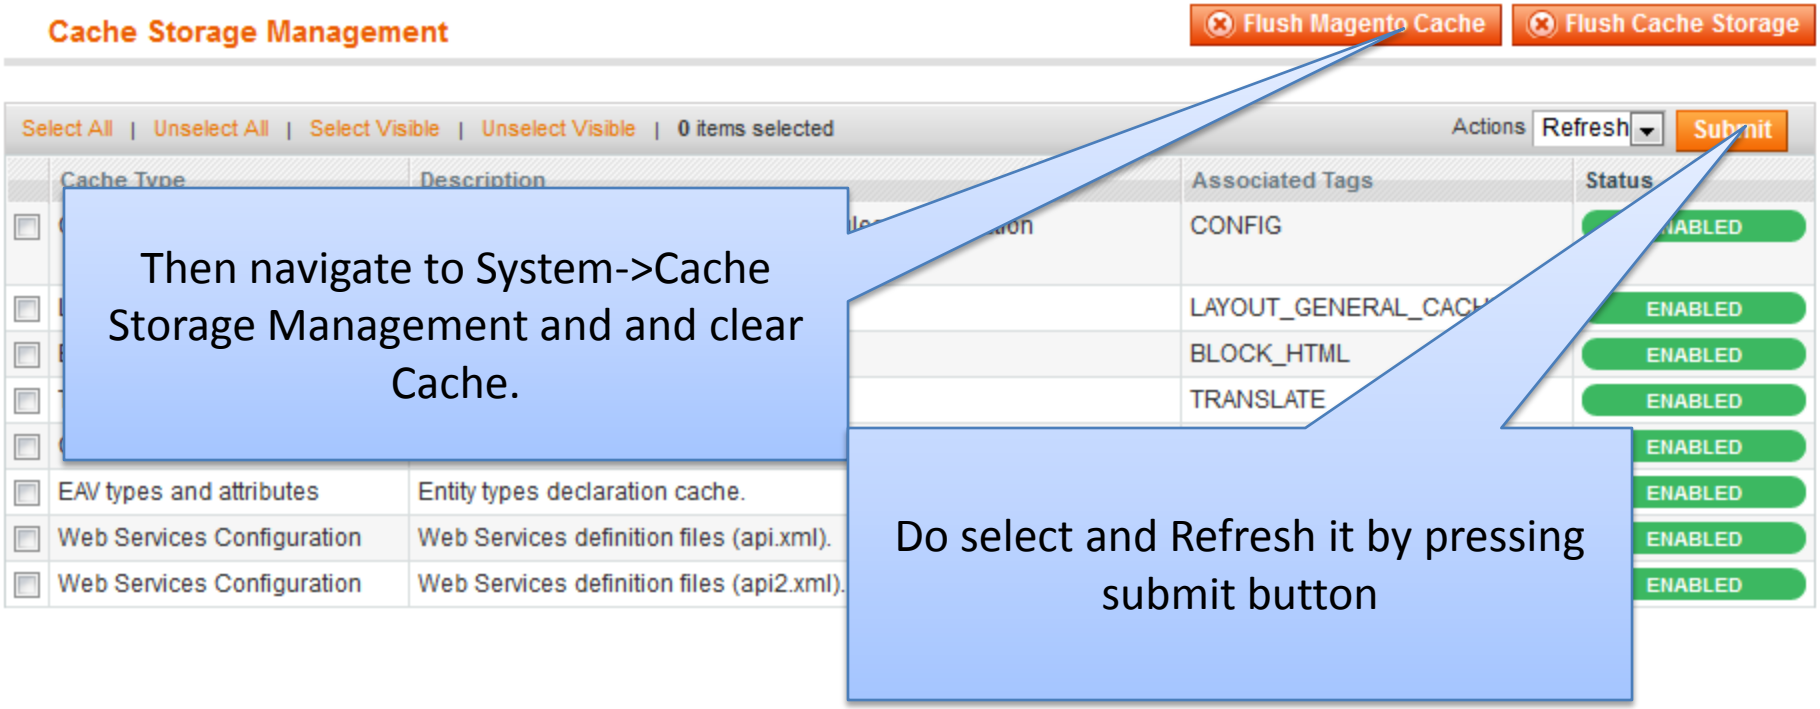
4. Upload file manually

   If you use a different from default theme - be sure to rename **app/design/frontend/base/default** and **skin/frontend/base/**default folders to your store's values. Using your FTP client upload content to your store root.



Installation Steps

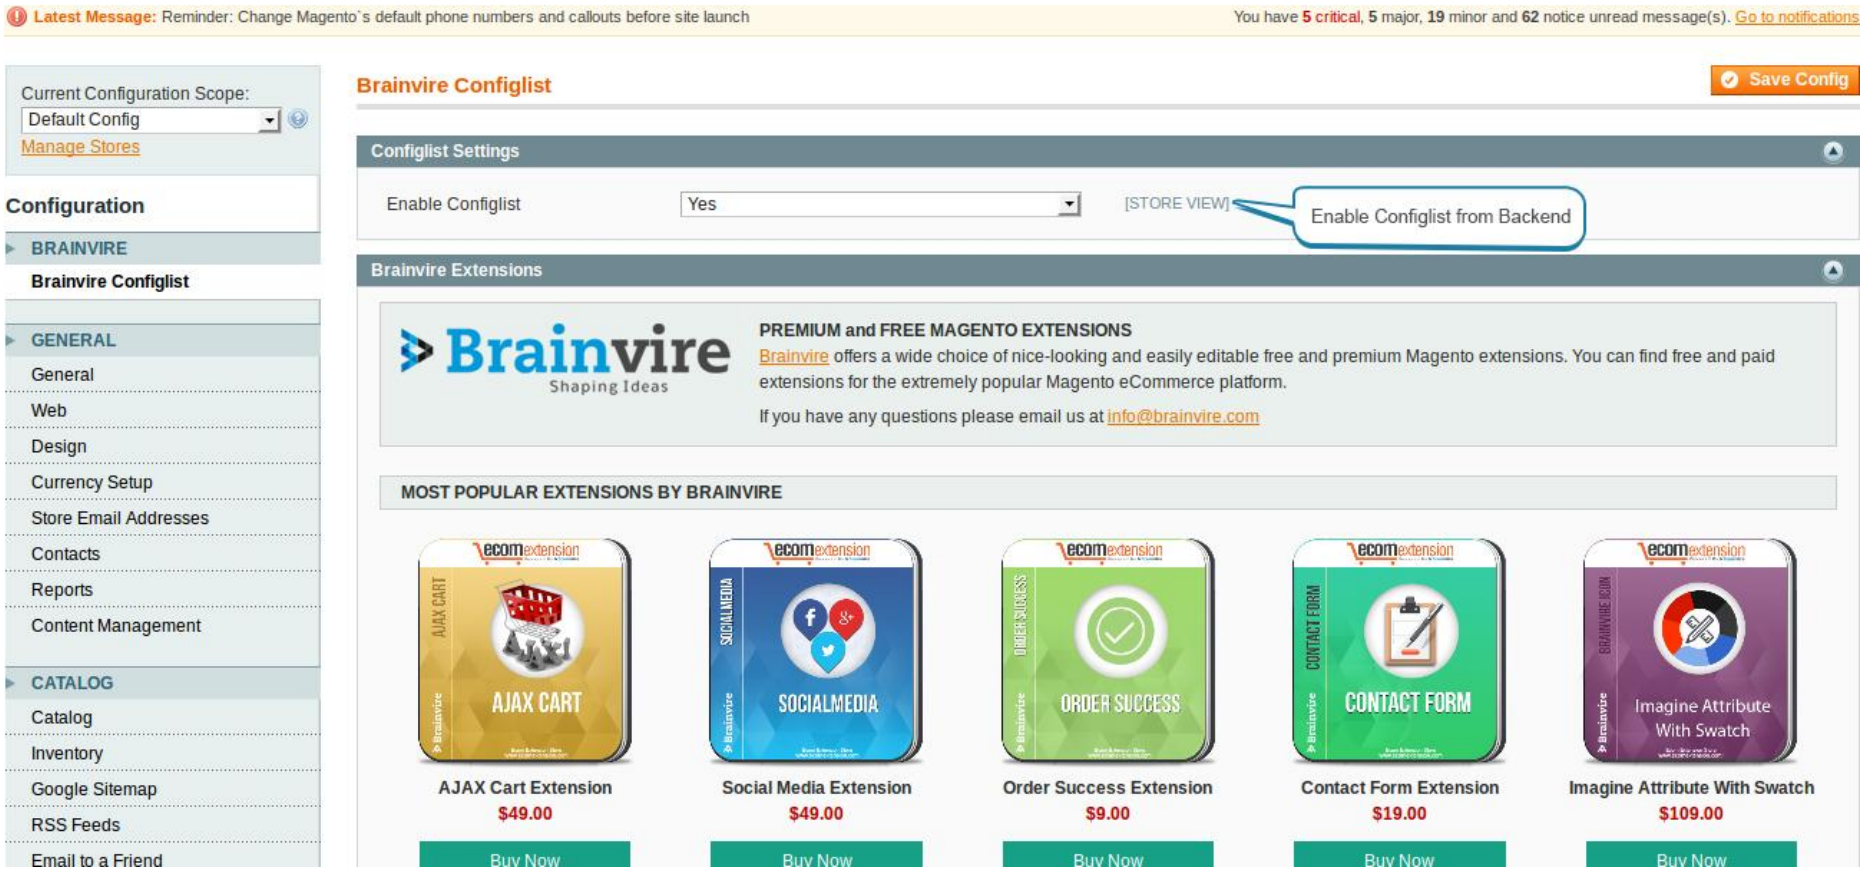
5. Clear Cache



6. Log out then log back in to your admin panel.

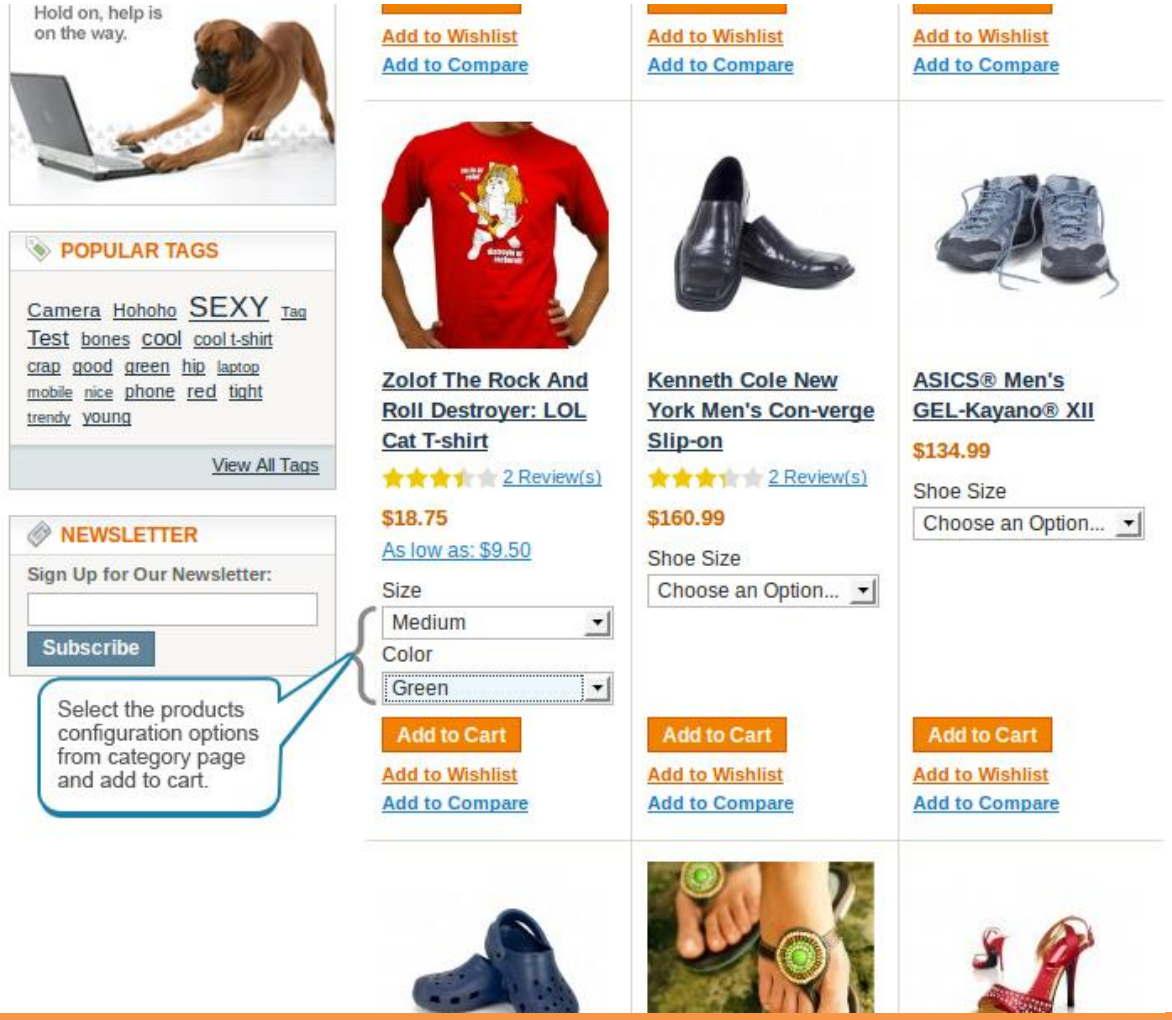
Backend Configuration

In Admin Panel, go to the System >> Config >> BRAINVIRE >> Brainvire Configlist >> General Settings and “Enable” Configlist Extension.



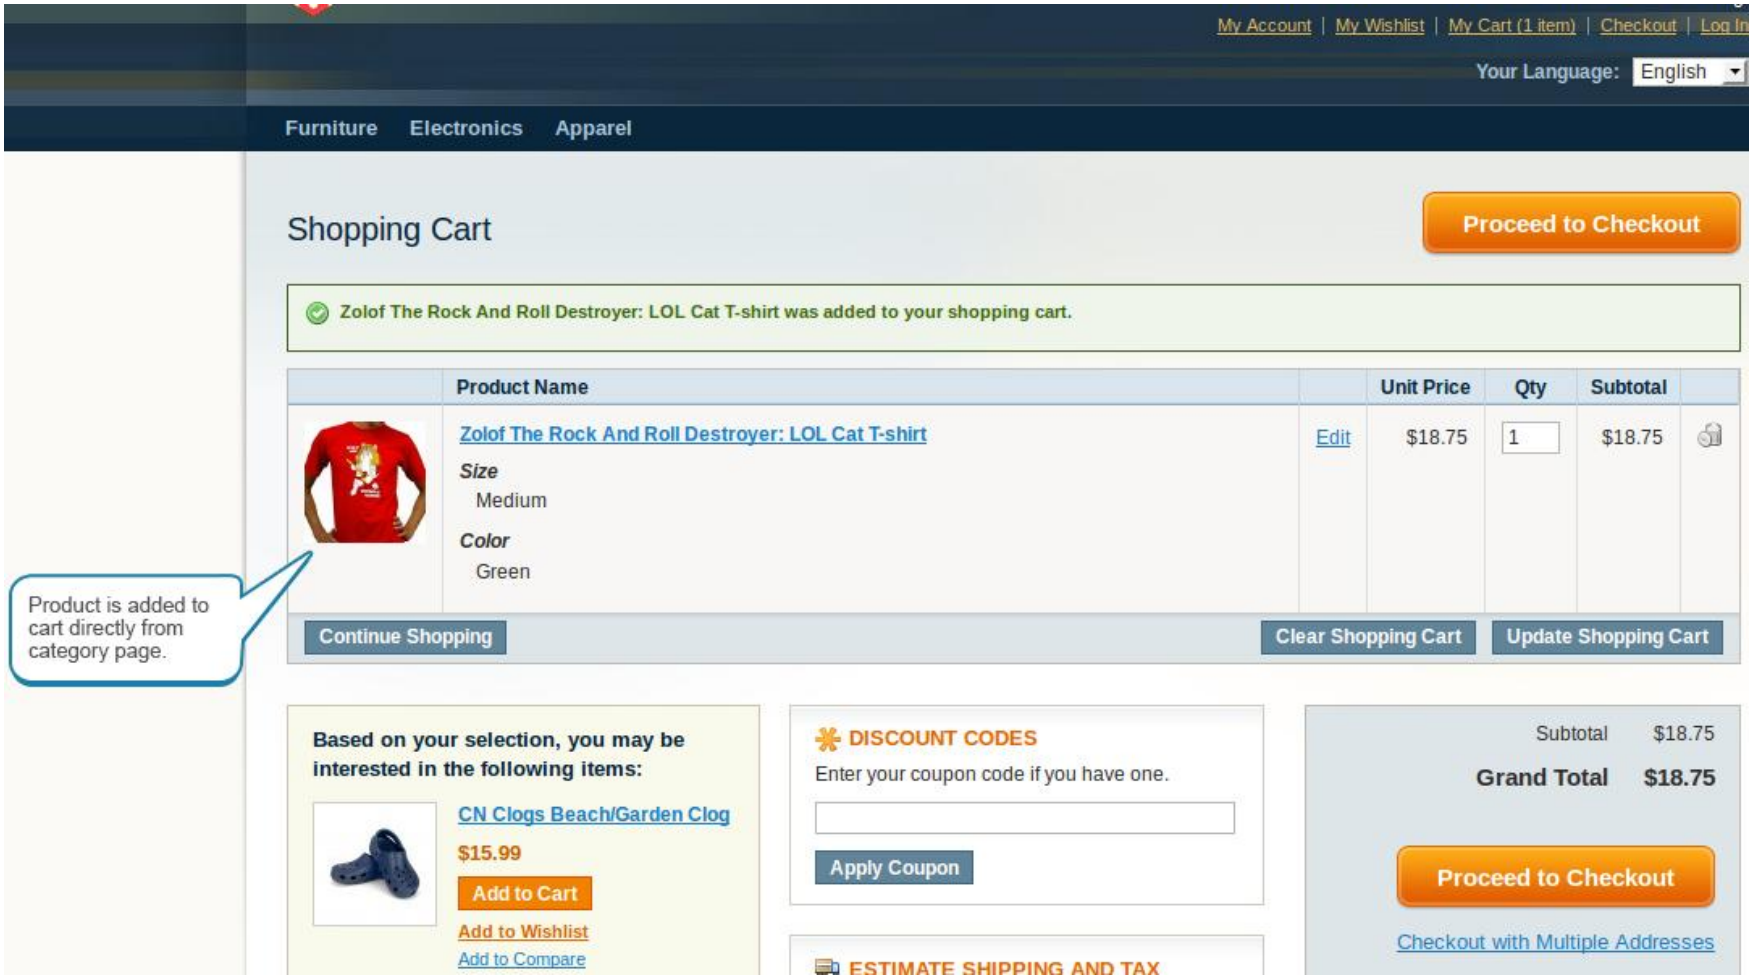
Backend Configuration

Select the product configuration options from category page and add to cart.



Backend Configuration

Product is added to cart directly from category page.



Uninstall

To force Magento uninstall the module.
Then replace <active>true</active> with <active>false</active> in the following files:

app/etc/modules/Brainvire_Configlist.xml

```
<Brainvire_Configlist>
        <active>true</active>
        <codePool>community</codePool>
</Brainvire_Configlist>
```
