OVERVIEW

Brainvire Order Success Magento Extension enables the user to look at the Order Details at the checkout success page.

Magento doesn't allow you to show order information in checkout success page. This extension allows you to have a look at the order information like billing details, shipping details and items ordered in checkout success page.

The extension is easy to install and use. The Brainvire Order Success Extension is Lightweight, fulfills the task with minimum obstruction and is in line with the Magento Standard Work flow.

Features

- Shows Order Information in checkout success page and show a billing and shipping method and address.
- Display product selected option in checkout success page with Enable/Disable functionality.
- Easy installation.
- Meets Magento programming guidelines.
- 100% open source.

Installation Steps

1. Clear the store cache under **var/cache** and all cookies for your store domain.
2. Disable compilation for Magento 1.4+. Log into Magento **Admin Panel** and go to **System → Tools → Compilation** and disable the compilation.

Dashboard Sales Catalog Customers Promotions Newsletter CMS Blog Reports **System** Get help for this page

Compilation Enable Run Compilation Process

Compilation State	
Compiler Status	Disabled
Compilation State	Compiled

Be sure that the Compilation Code is disabled (System->Tools -->Compilation)

Installation Steps

3. Disable JS & CSS merging

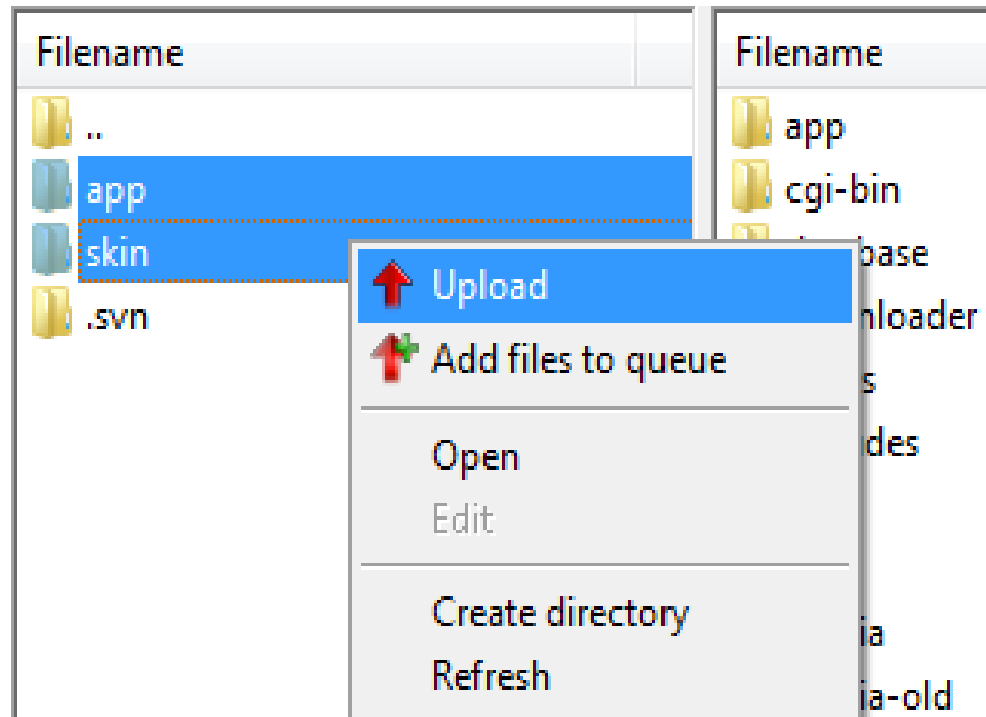

Navigate to System->Configuration->Developer Tab and disable "Merge css / js". We suggest that you enable error reporting.

The screenshot shows the Magento Developer configuration page. On the left is a navigation menu with sections: Configuration (GENERAL, Web, Design, Currency Setup, Store Email Addresses, Contacts, Reports, Content Management) and WEB-AND-PEOPLE (About Us, External Backend Notifications Disabler, Support, Gif Animate, Advanced Slider, Preload Images, Smart Columns). The main content area is titled 'Developer' and contains several sections: Developer Client Restrictions, Debug, Translate Inline, Log Settings, JavaScript Settings, and CSS Settings. In the Log Settings section, the 'Enabled' checkbox is circled in blue. In the JavaScript Settings section, the 'Merge JavaScript Files' dropdown is set to 'No' and is circled in blue. In the CSS Settings section, the 'Merge CSS Files (beta)' dropdown is set to 'No' and is circled in blue. A blue callout box points to these settings with the text: 'Navigate to System->Configuration->Developer Tab and disable "Merge css / js". We suggest that you enable error reporting.'

Installation Steps

4. Upload file manually

If you use a different from default theme - be sure to rename **app/design/frontend/default/default** and **skin/frontend/default/default** folders to your store's values. Using your FTP client upload content to your store root.

Installation Steps

5. Clear Cache

Cache Storage Management

Flush Magento Cache **Flush Cache Storage**

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected

Actions Refresh Submit

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/>		CONFIG	ENABLED
<input type="checkbox"/>		LAYOUT_GENERAL_CACH	ENABLED
<input type="checkbox"/>		BLOCK_HTML	ENABLED
<input type="checkbox"/>		TRANSLATE	ENABLED
<input type="checkbox"/>			ENABLED
<input type="checkbox"/>	EAV types and attributes	Entity types declaration cache.	ENABLED
<input type="checkbox"/>	Web Services Configuration	Web Services definition files (api.xml).	ENABLED
<input type="checkbox"/>	Web Services Configuration	Web Services definition files (api2.xml).	ENABLED
